Word List (In Order of Clues):

Tread Pattern, Perpetrator, Latent Shoeprint, Serology, Blood Type, Rh Factor, Ten Card, Unique Evidence, Ridge Pattern, Fingerprint, Whorl Pattern, Loop Pattern, Arch Pattern, Visible Prints, Latent Prints, Dactyloscopy

Clues:

1. Clue 1:- The pattern that appears on the bottom of a shoe or a tread mark made by a tire.
2. Clue 2:- A person who commits a crime.
3. Clue 3:- A present but invisible print.
4. Clue 4:- The study of the properties of serums. Several examples of serums are blood, saliva, and sweat.
5. Clue 5:- The type of blood you have. It will be either A, B, AB or O.
6. Clue 6:- Another chemical found in your blood cells. If you have it present, you are Rh positive, if it is not present, you are Rh negative.
7. Clue 7:- A form containing fingerprints of all five fingers from the left hand and the fingerprints of all five fingers on the right hand.
8. Clue 8:- Evidence that points to one individual.
9. Clue 9:- The wavy pattern produced by the cells growing on your finger tips. This ridge pattern causes fingerprints, which are unique to every person.
10. Clue 10:- Sweat glands in your finger tips make a water based oil solution that coats the ridges of your print. As these ridges make contact with a surface, oil is left behind and it creates a copy or a partial copy of your print.
11. Clue 11:- The ridges of your fingerprint are circular and look like a bull's eye target.
12. Clue 12:- Ridges of your fingerprint that enter from the left or the right, re curve and pass out the same side they entered appearing some what like a rounded knob.
13. Clue 13:- Ridges of your fingerprint that enter from one side, make a rise in the center and exit on the opposite side of your print having the appearance of a capital letter A.
14. Clue 14:- Fingerprints that can be easily seen because they were made by fingers that are dirty or oily.
15. Clue 15:- Fingerprints that are made only by the sweat that is on our finger ridges. These can be seen by dusting with a powder.
16. Clue 16:- The study of using fingerprints to identify someone.
